

June 16, 2014

DEVELOPMENT ADVISORY

Effective July 1, 2014
New code to be enforced in the State of California

Effective Date and Application of the 2013 Energy Code

July 1, 2014 is the statewide effective date established by the California Building Standards Commission for the 2013 California Energy Code.

The 2010 California Energy Code remains in effect and is applicable to all plans and specifications, for, and to the construction performed under that building permit where the application for a building permit is submitted to the local jurisdiction on or before June 30, 2014.

Stock Plans approved under previous codes will become void on the effective date of these new codes and will require revised plans which address the requirements of this new code. Precise grading plans for individual house permits will not be accepted until this requirement has been met.

If you have any questions, please do not hesitate to call the Development Department at (760) 955-5100.

Respectfully,

A handwritten signature in black ink, appearing to read "K. Collins".
